

A SHARED REPOSITORY OF HIEROGLYPHIC SIGNS:
THE *THOT* SIGN-LIST

ST. POLIS (F.R.S.-FNRS) & S. ROSMORDUC (CNAM)

OUTLINE

- Introduction
- The encoding of hieroglyphs
 - Principles of the *Manuel de Codage*
 - The existing sign-lists
- Hieroglyphic encoding in digital corpora
 - The Ramses corpus
 - The practices of annotation
 - Types of graphemic variations
 - Principles of normalization
- Towards the *Thot* Sign-list

INTRODUCTION

- Writing systems in Ancient Egypt

INTRODUCTION

- Writing systems in Ancient Egypt

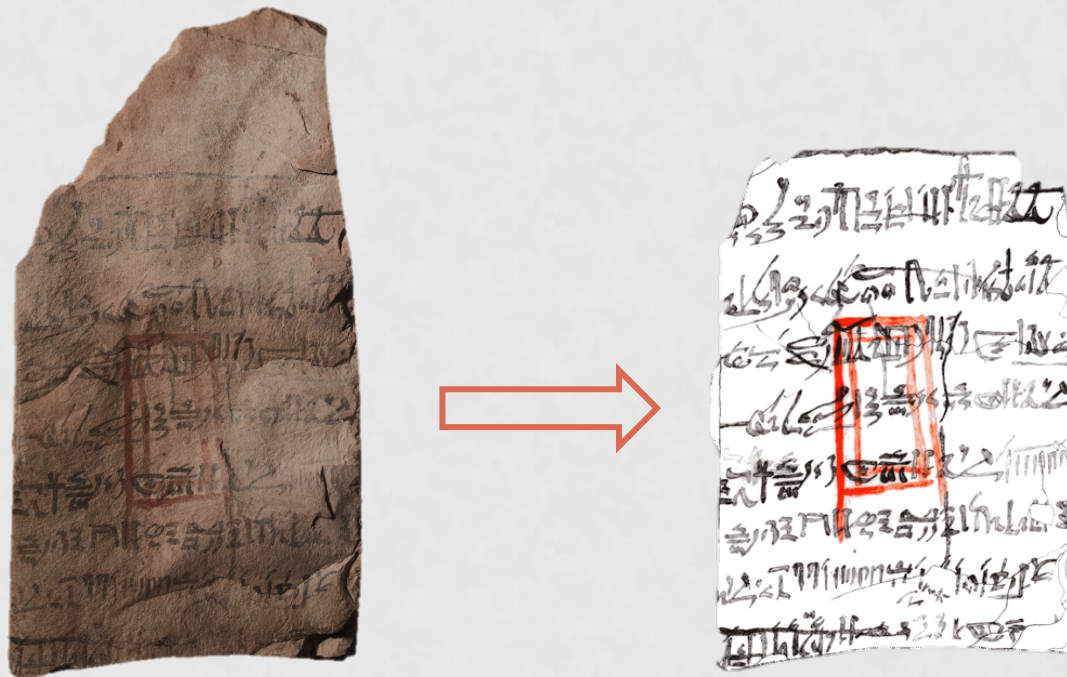

INTRODUCTION

- Writing systems in Ancient Egypt
- The *Thot* sign-list envisions solely:
 - Hieroglyphic signs
 - Hieratic signs

INTRODUCTION

- Writing systems in Ancient Egypt
- The *Thot* sign-list envisions solely the hieroglyphic and hieratic signs
- Various degrees of normalization of the iconic complexity:
 - Fac-simile

- Various degrees of normalization of the iconic complexity:
 - Fac-simile
 - Paleography
 - Hieroglyphic

§ 224

a. Vautour fauve ou vautour oricou

b. Ce type diffère de l'ancien par une courbure plus prononcée du dos avec une bosse au sommet et une tête dressée au-dessus du reste du corps et non pas rentrée comme dans Gardiner G 14 ()¹.

c. Radicogramme de *mw.t*, « mère » (pl. XI/2; XXII/2h); valeurs phonétiques *m* (pl. XVII/1) et *nh* par assimilation au signe § 228; déterminatif de *nr.t*, « vautour » (pl. XXII/3b, deux fois).

1. Quelques exemples : *Edfou* XII, pl. CCCCXX (en ht, bandeau); *Dendara* II, pl. CIII (en ht, bandeau); V, pl. CCCCXLVIII (en ht, bandeau); CCCCXLIX (en ht, bandeau); VI, pl. CCCCLXXXI (en ht, bandeau); *Porte d'Évergète*, pl. 5 (à g., col. derrière Hathor); 38 (en ht, bandeau l. 1); *Porte de Mout*, pl. VIII, n° 5, 2; *Philâ* I, fig. 8 (à dr., col. derrière Ha); fig. 19 (en bas, milieu, devant le roi, col. 3); II, p. 362 (2^e l.).

- Various degrees of normalization of the iconic complexity

THE ENCODING OF HIEROGLYPHS

THE ENCODING OF HIEROGLYPHS

- The « Manuel de Codage »
 - 1988, working group « informatique et égyptologie » of the IAE
 - Based on *Glyph*, a software solution developed by Jan Buurman (beginning of the 1970's)
- Principles
 - Codes for hieroglyphic signs
 - Positioning operators

r:a-ra-G7 =

THE ENCODING OF HIEROGLYPHS

- The original Sign-list (Appendix D)

THE ENCODING OF HIEROGLYPHS

- The original Sign-list (Appendix D)
 - Based on the slips of Berlin + lead fonts (e.g. metal typesetting font of the IFAO)

THE ENCODING OF HIEROGLYPHS

- The original Sign-list (Appendix D)
 - Based on the slips of Berlin + lead fonts (e.g. metal typesetting font of the IFAO)
 - Distinction similar to the unicode distinction between *character* and *glyph*

Hommes debout associés à un signe:

THE ENCODING OF HIEROGLYPHS

- The original Sign-list (Appendix D)
 - No comments and no references in the original Sign-list
 - Font designers: what matters in a sign?
 - Users: which sign should be used?

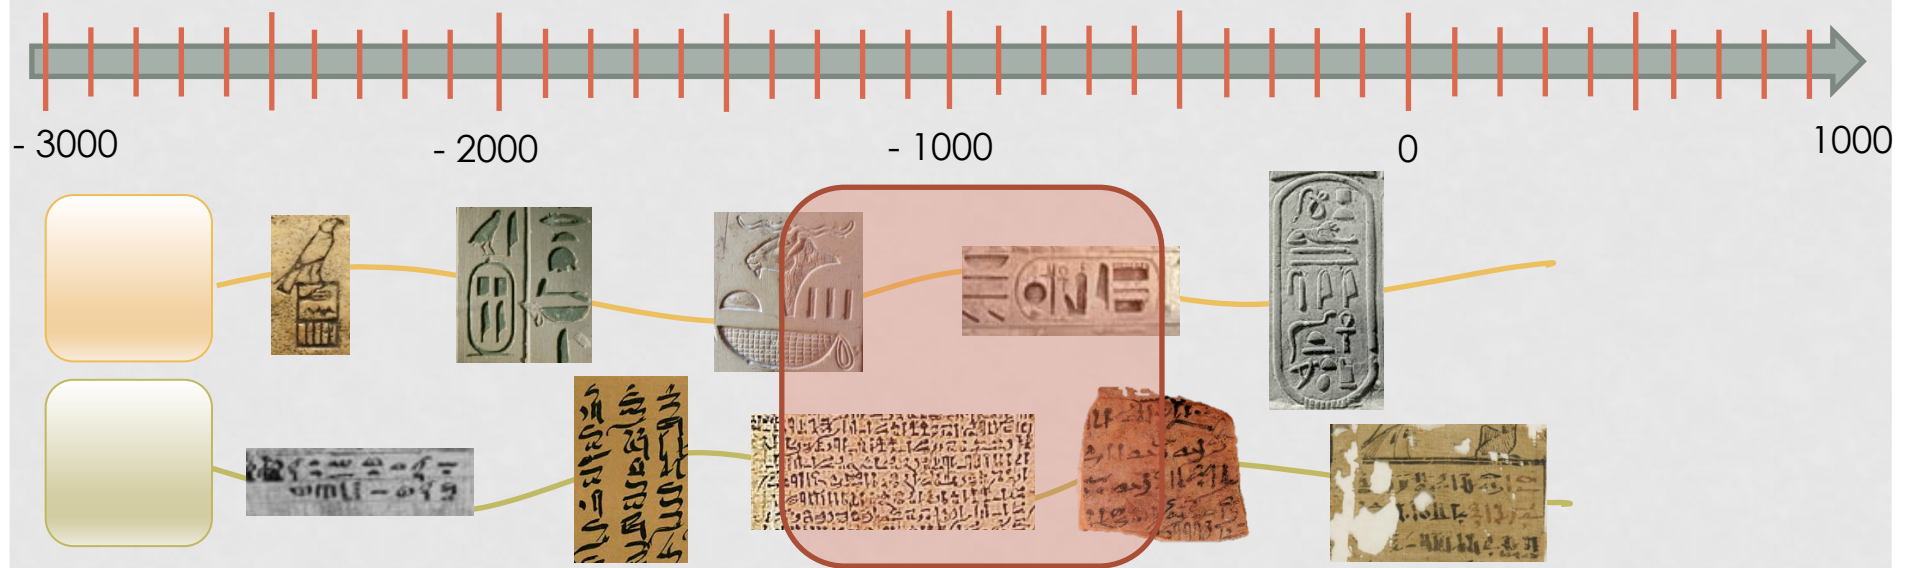

THE ENCODING OF HIEROGLYPHS

- The original Sign-list (Appendix D)
 - No comments and no references in the original Sign-list
 - Font designers: what matters in a sign?
 - Users: which sign should be used?
- Extensions of the MdC in the various hieroglyphic text editors (Gozzoli 2013)
- Evolution of the Sign-list depending on specific needs (e.g., the edition of the temple of Denderah)

HIEROGLYPHIC ENCODING IN DIGITAL CORPORA

HIEROGLYPHIC ENCODING IN DIGITAL CORPORA

- The Ramses Project
 - Goal: building a richly annotated corpus of Late Egyptian texts, with the hieroglyphic spellings

HIEROGLYPHIC ENCODING IN DIGITAL CORPORA

- Encoding of the hieroglyphs in Ramses
 - **1st step (2007-2015):** “systematic” (speed and efficiency)
 - ⇒ Principle: “follow as closely as possible the hieroglyphic transcription of the edition encoded”

P. BM EA 10412, v^o 4 (= Janssen 1991: pl. 42)

P. BM 10412 v ^o 4	 mtw default mtw (conj.)	 k tu	 smi.t infinitive s'en aller	 r default vers, pour	LRL 56, 4

	K ₁	
	K ₂	
	L ₁	
	L ₂	
	S	

TYPES OF GRAPHEMIC VARIATIONS

TYPES OF GRAPHEMIC VARIATIONS

(1)  : le maçon n'escalade pas le mur, il a les deux pieds à terre.

(2)  et non .

(3) Le signe  est bien incliné, mais son extrémité pointue est à gauche.

(4)  est petit comme à la colonne 21.

(5) On pourrait croire qu'il y a quatre paires de cornes et qu'on a affaire à un signe complexe comme ,  ou ; mais d'une part les pattes n'ont pas été multipliées et d'autre part il y a le signe du pluriel . Les traits entre

les deux cornes sont en réalité un ornement composé, semble-t-il, de plumes d'autruche et qui est fréquent sous les XIX^e et XX^e dynasties (ex. : 1^{re} cour du temple de Ramsès II à Abydos : MARIETTE, *Abydos*, II, pl. 10, en bas) pour les bœufs gras dans les cérémonies.

(6) Le déterminatif de *mnš* ressemble beaucoup à celui d'Abydos, col. 37 (cf. pl. VI, n° 7). Il est identique à celui de K 1, col. 25.

(7) Le cercle central (pupille et iris) est, comme partout dans ces textes, visible en entier.

TYPES OF GRAPHEMIC VARIATIONS

Fig. 1. Tombe thébaine n° 101 (Tjenro). Dessin d'après DAVIES-GARDINER, *Ancient Egyptian Paintings*, pl. 34.

Fig. 2. Tombe d'Amarna n°4. Dessin d'après DAVIES, *Amarna*, I, pl. XIV.

Fig. 3. Tombe d'Amarna n° 4. Dessin d'après DAVIES, *Amarna*, I, pl. XIV.

TYPES OF GRAPHEMIC VARIATIONS

Fig. 2. n°4. De *Am.*

Fig. 4. Tombe d'Amarna n°4. Dessin d'après DAVIES, *Amarna*, I, pl. XIV.

Fig. 5. Tombe d'Amarna, n°4. Dessin d'après DAVIES, *Amarna*, I, pl. XIV.

TYPES OF GRAPHEMIC VARIATIONS

Fig. 1. Tombe thébaine n° 16 (Tjenro). Dessin d'après DAVIE GARDINER, *Ancient Egyptian Paintings*, pl. 34.

Fig. 7. Tombe thébaine n° 40 (Houy). Dessin d'après GARDINER-DAVIES, *Tomb of Huy*, pl. XXX.

Tombe d'Amarna, sin d'après DAVIES, *Amarna*, I, pl. XIV.

TYPES OF GRAPHEMIC VARIATIONS

- ⇒ Not in the MdC
- ⇒ No reference or documentation available

TYPES OF GRAPHEMIC VARIATIONS

- Sources of graphemic variation
 - **The document**
 - **The edition**
 - **The encoding**
 - **The Manuel de Codage**

TYPES OF GRAPHEMIC VARIATIONS

- Lack of explanations in the MdC: the sign for *sn*
 - Gardiner (³1957 : 512) distinguishes T22 from a variant T23

22  two-barbed arrow-head¹ Ideo. in  *snw*, O.K. var. ² 'two' and in related words like  *sn* (*śn*) 'brother'. Hence phon. *sn* (*śn*),^{2a} exx. ³ *sn* (*śn*), var. Pyr. ⁴ *śn*, 'smell', 'kiss';    *sntr* 'incense'.

¹ Not a spear-head, but an arrow-head, SCHARFF 33; among earliest exx. (PETR. *Eg. Hier.* 753-6) is one with quite short shaft; for later lengthening cf. the sign for 'foot' (D 58); the two barbs yield the notion of duality, contrast the sign for 'one' (T 21), *AZ.* 47, 36. ² *Urk.* i. 147, 3. ^{2a} For *f* see *snf* 'loose', *Pyr.* 1100. ³ So already *Pyr.* 1323. ⁴ *Pyr.* 1027, unless a different word.

23 ¹ alternative form of last (Dyn. XVIII) Use as last.
¹ Ex. *Th. T. S.* iii. 21.

TYPES OF GRAPHEMIC VARIATIONS

- Lack of explanations in the MdC: the sign for *sn*
 - Gardiner (³1957 : 512) distinguishes T22 from a variant T23

HOW TO STANDARDIZE THE ENCODING OF HIEROGLYPHS

IN ANNOTATED CORPORA?

PRINCIPLES OF NORMALIZATION?

Ideally, the encoding of hieroglyphs should be:

- reproducible
- economic
- no loss of (linguistic) information

The big question is:

- What is meaningful and what is not?

Proposal:

- Take into account the function of hieroglyphic signs

PRINCIPLES OF NORMALIZATION?

The hieroglyphic sign functions

- See Polis & Rosmorduc (2015)

	+ SEMOGRAM		– SEMOGRAM
AUTONOMOUS	Pictogram	Logogram	Phonogram
NON-AUTONOMOUS	Classifier	Radicogram	Interpretant
	– PHONEMOGRAM	+ PHONEMOGRAM	

Fig. 10 A taxonomy of the hieroglyphic sign functions

PRINCIPLES OF NORMALIZATION?

The hieroglyphic sign functions

- See Polis & Rosmorduc (2015)
- The square of hieroglyphic sign functions (Schenkel 1997; Kammerzell 2004: 151; Lincke 2011: 3; Lincke & Kammerzell 2012)

	+ signified	- signified
+ autonome	Logogram	Phonogram
- autonome	Classifier	Interpretant (« complément phonétique »)
	Semogram	Phonogram

PRINCIPLES OF NORMALIZATION?

The hieroglyphic sign functions

- See Polis & Rosmorduc (2015)
- The square of hieroglyphic sign functions (Schenkel 1997; Kammerzell 2004: 151; Lincke 2011: 3; Lincke & Kammerzell 2012)

	+ signified	- signified
+ autonome	Logogram	Phonogram
- autonome	Classifier	Interpretant (« complément phonétique »)
	Semogram	Phonogram

- **Observation 1.** Whatever its shape, form, etc. a hieroglyphic sign used as a **phonogram** is unable to modify the meaning or reference of a word in context.

PRINCIPLES OF NORMALIZATION?

The sign *šsp* (O 42)

- Very many variants in the MdC

- Do they cover all the variants attested in our documents?
- Are they relevant and meaningful for annotated corpora?

PRINCIPLES OF NORMALIZATION?

The sign *šsp* (O 42)

- *Medinet Habou, pl. 45, col 8*

- O42K = a quite good approximation

PRINCIPLES OF NORMALIZATION?

The sign *šsp* (O 42)

- *P. Chester Beatty 1, pl. XXII, l. 2*

PRINCIPLES OF NORMALIZATION?

The hieroglyphic sign functions

- See Polis & Rosmorduc (2015)
- The square of hieroglyphic sign functions (Schenkel 1997; Kammerzell 2004: 151; Lincke 2011: 3; Lincke & Kammerzell 2012)

	+ signified	- signified
+ autonome	Logogram	Phonogram
- autonome	Classifier	Interpretant (« complément phonétique »)
	Semogram	Phonogram

- **Observation 1.** Whatever its shape, form, etc. a hieroglyphic sign used as a **phonogram** is unable to modify the meaning or reference of a word in context.
- **Proposal 1.** A single standard code should be used for all these uses.

PRINCIPLES OF NORMALIZATION?

The hieroglyphic sign functions

- See Polis & Rosmorduc (2015)
- The square of hieroglyphic sign functions (Schenkel 1997; Kammerzell 2004: 151; Lincke 2011: 3; Lincke & Kammerzell 2012)

	+ signified	- signified
+ autonome	Logogram	Phonogram
- autonome	Classifier	Interpretant (« complément phonétique »)
	Semogram	Phonogram

PRINCIPLES OF NORMALIZATION?

The hieroglyphic sign functions

- See Polis & Rosmorduc (2015)
- The square of hieroglyphic sign functions (Schenkel 1997; Kammerzell 2004: 151; Lincke 2011: 3; Lincke & Kammerzell 2012)

	+ signified	- signified
+ autonome	Logogram	Phonogram
- autonome	Classifier	Interpretant (« complément phonétique »)
	Semogram	Phonogram

- **Observation 2.** A hieroglyphic sign used as a semogram, because of its potential iconic link with the meaning/referent of the word, can modify the meaning or reference of a word in context.

PRINCIPLES OF NORMALIZATION?

Complex semogram

- Logogram in the Kanais inscription

Water carrier A344

Normalized encoding

Variants of the herdsman:
A33, A33A... et A383

PRINCIPLES OF NORMALIZATION?

The hieroglyphic sign functions

- See Polis & Rosmorduc (2015)
- The square of hieroglyphic sign functions (Schenkel 1997; Kammerzell 2004: 151; Lincke 2011: 3; Lincke & Kammerzell 2012)

	+ signified	- signified
+ autonome	Logogram	Phonogram
- autonome	Classifier	Interpretant (« complément phonétique »)
	Semogram	Phonogram

- **Observation 2.** A hieroglyphic sign used as a semogram, because of its potential iconic link with the meaning/referent of the word, can modify the meaning or reference of a word in context.
- **Proposal 2.** Meaningful variants of semograms should be coded in annotated corpora

TOWARDS A SHARED REPOSITORY

THE *THOT* SIGN-LIST

TOWARDS THE *THOT* SIGN-LIST

Requisite 1. Each sign has to be

- **Described**

- Functions
- Distinctive iconic features (so as to limit the number of variants) with a controlled vocabularies :
 - Units - principle of the Unicos (R. Vergnieux)

- Predicates (« holding », « wearing », etc.)

2000	Wurm	<u>Wb</u> I 498,5
2001	(gerade)	CT IV 1b

TOWARDS THE *THOT* SIGN-LIST

- **Advantages**

- Methodologically
 - Hieroglyphic signs can receive arbitrary IDs
 - A way out of hierarchical taxonomies => reticular (i.e. network-like) organization of the sign-list
- Practically
 - Easy to find a sign based on its functions and components.

TOWARDS THE *THOT* SIGN-LIST

Requisite 2. Attribute for the degree of abstraction between token et type

	Glyph	Class	Character
Distinctive criterion	Morphological	Iconic	Functional
Description	Stylistic (« Courbure prononcée du dos »)	Controlled vocabulary	Phonogram with the value <i>šsp</i>

TOWARDS THE *THOT* SIGN-LIST

- **Advantages**

- The degree of normalization is explicit (very useful for encoding and queries)
- The hierarchical links between signs are explicit
- The encoding is not polluted by the multiplication of variants

TOWARDS THE *THOT* SIGN-LIST

Requisite 3. The sign-list should be shared and enriched by the various projects of annotated hieroglyphic texts

Dung-beetle

ID	Type	Standardized Drawing
98765901	Character	

Contents [\[hide\]](#)

- 1 Description
- 2 Function(s)
- 3 Codes
- 4 Hieratic
- 5 Variants
- 6 References

Description [\[edit\]](#)

Scarabeus sacer, a dung-beetle with six legs

Function(s) [\[edit\]](#)

- Logogram

'dung-beetle', ref. \$\$\$

Codes [\[edit\]](#)

- Gardiner : L1
- MdC : L1
- Hornung-Schenkel : L_0100
- Unicode : F3ECO

THANKS !
