

## Communication between microbiologist and ophtalmologist

## From laboratory to physician Notification of insufficient quantity of specimen

- Reduction of ordered tests to target specific organisms
- Alarming results (= medical emergencies)
- Gram negative cocci (N.gonorrhoeae) in conjonctival specimen
- Paeruginosa in a corneal culture
  Bacillus spp in inner eye cultures
- Yeast or mold structural elements (Direct microscopy)

## From physician to laboratory • Very small amount of material, warning • Corneal specimens related to lens, LASIK associated, trauma with foreign object, etc. • 6-12 months postoperative infection; to perform AST even on Staphylococcus epidermidis
