Nuclear Non-Proliferation in International Law

Volume II - Verification and Compliance

- ▶ Offers up-to-date research
- ▶ Evaluates current developments comprehensively
- ▶ Provides proposals for further development

This second Volume in the book Series on *Nuclear Non-Proliferation in International Law* discusses the legal interpretation and implementation of verification and compliance with the Treaty of the Non-Proliferation of Nuclear Weapons, 1968; the Comprehensive Nuclear Test-Ban Treaty, 1996; and the Treaty establishing the European Atomic Energy Community (EURATOM), 1957. It specifically examines the question, contested in recent academic writings, whether the International Atomic Energy Agency (IAEA) is competent to verify not only the correctness, but also the completeness of national declarations. Topical legal issues of verification and its technical and political limits as well as peaceful settlement of disputes and countermeasures are discussed in-depth.

The Series on *Nuclear Non-Proliferation in International Law* provides scholarly research articles with critical commentaries on relevant treaty law, best practice and legal developments, thus offering an academic analysis and information on practical legal and diplomatic developments both globally and regionally. It sets a basis for a further constructive discourse on the topic at both national and international levels. A Third Volume, to be published in Autumn 2016, will focus on legal issues of safety and security of the use of nuclear energy for peaceful purposes.
