Upcoming Seminars

- **To be announced**
Wednesday 28/04/2010 - 12:30 pm - E50 (B35)
Pascale Jackers
- **Including prior knowledge in shrinkage classifiers for genomic data** [abstract]
Friday 30/04/2010 - 12:30 pm - Room R7, Montefiore Institute (B28)
Joined seminar with the symposium
Jean-Philippe Vert, Mines ParisTech - Institut Curie
- **Combinatorial biosynthesis of backbone cyclic peptides in Escherichia coli. Toward the selection of new drugs** [abstract]
Wednesday 12/05/2010 - 12:30 pm - A3 (B7b)
Patrice Soumillon (UCL)

Past Seminars

- **Alma-in-Silico** [abstract]
Wednesday 14/04/2010 - 12:30 pm - 1/75 (B6c)
Xavier Tordo
- **Multilayer polyelectrolyte films and their "bio" functionalization** [abstract]
Wednesday 24/03/2010 - 12:30 pm - E50 (B35)
Jean-Claude Voegel (UMR 977 Strasbourg, France)
- **Clinical Proteomics and Biomarker Discovery** [abstract]

Wednesday 17/03/2010 - 12:30 pm - 1/75 (B6c)

Andrei Turtot

- **Analysing virus/host interactions and their co-evolution – the PhEVER database and related projects** [abstract]

Wednesday 24/02/2010 - 12:30 pm - 1/75 (B6c)

Leonor Palmeira, Department of infectious and parasitic diseases, Laboratory of Immunology-Vaccinology, ULg

- **The beautiful World of Toxins**

Wednesday 10/02/2010 - 12:30 pm - E50 (B35)

Dr. Nicolas Gilles (CEA-Saclay, DSV/iBiTec-S/SIMPRO, Toxins, Receptors and Channels team)

- **Bioinformatics and the origin of the eukaryotic cell** [abstract]

Wednesday 27/01/2010 - 12:30 pm - 1/75 (B6c)

Damien Devos (EMBL, Germany)

- **Benelux Bioinformatics Conference**

14-15/12/2009

Website

- **Structural features and interaction defects of point mutations in proteins associated with Human Mendelian disorders** [abstract]

Wednesday 09/12/2009 - 12:30 pm - I.Raik (B31)

Fabien Heuze (GIGA-R)

- **Investigation of Biclustering Methods for High Dimensional 'Omic' Data** [abstract]

Tuesday 08/12/2009 - 11:00 am - Room A (GIGA+1)

Dan Lin

- **Multi-scale modeling of bone regeneration** [abstract]

Wednesday 25/11/2009 - 12:30 pm - amphi Welsh (CHU, B35)

Liesbet Geris (Génie biomécanique)

- **G-quadruplex** [abstract]

Thursday 19/11/2009 - 12:30 pm - amphi Roksam (CHU, B35)

Valérie Gabelica (Mass Spectrometry Laboratory)

- **New approach in anti-microbial and anti-adhesion surfaces** [abstract]

Wednesday 14/10/2009 - 12:30 pm - A4 (B7b)

Germaine Zocchi (LBMGG)

- **From data to statistical analysis: Explaining genetic heritability by interaction analysis?**

[abstract]

Wednesday 30/09/2009 - 11:00 am - Amphi Jorissen (CHU)

Kristel Van Steen

- **Top Down Sequencing of Biopolymers Using In Source Decay**

Wednesday 16/09/2009 - 12:30 pm - Amphi Stainier (B36)

Edwin de Pauw

- **Prediction of genetic values in animal breeding: history, methods and post-genomic challenges** [abstract]

Friday 12/06/2009 - 2:00 pm - S.33 (B37 - Institut de Mathématique)

Daniel Gianola, University of Wisconsin-Madison

- **Independent subspace analysis and extraction** [abstract]

Friday 05/06/2009 - 11:00 am - 2.93 (B28 - Montefiore)

Fabian J. Theis

Computational Modeling in Biology - <http://emb.helmholtz-muenchen.de>

IBIS, Helmholtz Center Munich & Mathematics, TU Munich

- **Intrinsically unstructured proteins: regulation and disease** [abstract]

Tuesday 02/06/2009 - 12:30 pm - Sternon (B36 - CHU)

Madan Babu - University of Cambridge - MRC Laboratory of Molecular Biology

- **GEPI: A promising tool for nanotechnologies**

Wednesday 20/05/2009 - 12:30 pm - 1/75 (B6c)

Christelle Vreuls

- **Proteomics studies of the secretome of the lignocellulolytic fungus *Penicillium purpogenum*** [abstract]

Thursday 07/05/2009 - 3:00 pm - R54 (Europe)

Jaime Eyzaguirre (Universidad Andrés Bello, Chile)

Co-organised with the [CIP](#)

- **A systems biology approach to apoptosis signalling** [abstract]

Wednesday 22/04/2009 - 12:30 pm - S.01 (B7a)

Eric Bullinger

- **Application of proteomic tools to investigate symbiotic associations in insects** [abstract]

Wednesday 08/04/2009 - 12:30 pm - Amphitheatre (CHU, B36)

Frederic Francis

- **The Octarellins: the alliance of "in silico" and "in vivo" combinatorial design**

Wednesday 25/03/2009 - 12:30 pm - 1/75 (B6c)

Cécile van de Weerd

- **Debriefing of the Systems Biology Course from Biobase (Germany)**

Monday 09/03/2009 - 12:30 pm - R42 (B6c)

Pascal Jackers

- **Kick-off meeting** [abstract]

Wednesday 04/03/2009 - 12:30 pm - Amphitheatre (CHU, B35)

MEETINGS OF THE WEEK

Monday March 9

GIGA-Systems Biology and Chemical Biology

B6, R42 meeting room, 12:30

Briefing of the Systems Biology Course from Biobase (Germany)

By Pascale Jackers

Tuesday March 10

GIGA-R Seminar

Sternon, 12:30

Albert Heck

Netherlands Proteomics Centre

Enabling technologies in Protein Mass Spectrometry (be careful : this

seminar concerns stem cell people too)

Thursday March 12

GIGA-Signal Transduction

B34, Room A, 9:00

Group of Alain Chariot

Pierre Close

Purification of nuclear mRNP particles and characterization of their content

and function in transcription

GIGA-I3 (Virus meeting)

B34, Room A, 16:00

Isabelle Ote

Characterisation of post-transcriptional properties of VZV IE4 protein:

interactions with the spliceosome and modulation of cellular mRNA metabolism.

Besma ben Daamer

Modulation of cellular glycotransferase and glycosidases by VZV

Ludvine Herman

Human Papilloma Virus (HPV) pseudoparticles : interactions with

antigen-presenting cells and development of new approaches of anti-HPV

therapies.

Friday March 13

GIGA-I3

B34, Room A, 9:00

Maite Manise

Production de cytokines dans l'asthme réfractaire (Renaud Louis)

Caroline Thielens

T cell lymphoma (Laurence de Leval)

GIGA-Cancer

B35, Jorissen, 12:00

Julien DELILLEUX (LBRD)

Contribution of MFI-MMP in tumour progression

Sophie Frotte (LRM)
