Once upon a time...
University of Liège *(http://www.ulg.ac.be)*

One of the 3 main universities of the French-speaking part of Belgium

Public and pluralist

Complete university
(8 Faculties, 1 School, 1 Institute)

- 38 bachelor degrees
- 178 master degrees (21% of which are unique in French-speaking Belgium)
- 67 complementary master degrees

18,000 students (97 nationalities)

4,300 staff (2,800 professors and researchers)

- 530 research units
- 3,000 to 3,500 publications/ year ?

OA @ ULg: a longstanding story...

Based on a real conviction shared by

- authorities
  - The well-known **blog of Rector Bernard Rentier**
    an active advocate for OA
    http://recteur.blogs.ulg.ac.be/?cat=10

  - **EOS** (*Enabling Open Scholarship*): launched in 2007
    (Liege Convention http://recteur.blogs.ulg.ac.be/?p=151)
    A membership organisation for universities and research
    institutions whose one of the top priorities is to help
   universities adopt effective OA policies
    http://www.openscholarship.org

- and librarians:

  Continuing to serve users in the future with effectiveness?
  No other choice than to be deeply involved in the development of OA!

OA @ ULg: a longstanding story...

And concrete initiatives of the ULg Library Network:

- **PoPuPs**: a portal and toolbox for diffusion of open access journals published by ULg members (since 2004) http://popups.ulg.ac.be

-

- **BICTEL/e**: a repository for PhD theses (since 2006) http://bictel.ulg.ac.be

- **ORBi**: Open Repository and Bibliography for ULg http://orbi.ulg.ac.be/

A propos de PoPuPS :

▸ Présentation
▸ Contexte scientifique
▸ Syndication de contenu
▸ Pour plus d'informations

Présentation :

Le **Po**rtail de **Pu**blication de **P**ériodiques **S**cientifiques (*PoPuPS*) est destiné à permettre aux responsables de revues de l'Université de Liège et de la Faculté universitaire des sciences agronomiques de Gembloux (FSAGx), réunis au sein de l'académie Wallonie Europe, de diffuser aisément et rapidement sur le net leurs revues en texte intégral librement accessible. Cette mise en ligne permet une visibilité plus large des recherches à l'échelle internationale et une notoriété accrue des revues. Chaque revue garde la liberté de diffuser en parallèle ses numéros sous forme imprimée. Ce projet se veut donc alternatif et complémentaire par rapport à d'autres initiatives commerciales similaires.

PoPuPS est basé sur le partenariat : le Réseau des Bibliothèques développe la plateforme et intervient comme support pour les responsables des revues. Chacune de celles-ci conserve la responsabilité complète des contenus qu'elle diffuse, garantisssant ainsi une totale indépendance éditoriale.

PoPuPS respecte les standards OAI internationaux de diffusion rendant celui-ci interopérable avec des initiatives similaires existant à l'étranger, de manière à lui permettre d'être intégré à un vaste réseau international.

PoPuPS utilise la technologie développée par Lodel.org.

Contexte scientifique :

PoPuPS fait partie de l'arsenal d'initiatives mises en place par le Réseau des Bibliothèques de l'Université de Liège dans le cadre de sa politique de soutien à un accès libre à l'information scientifique (Open Access). Ces intitatives comportent également le projet Bictel de diffusion des versions électroniques des thèses publiées à l'ULg, ainsi que le projet de répertoire institutionnel des recherches menées par les scientfiques de l'ULg.

L'objectif de la communauté scientifique n'est en effet pas de garantir des revenus financiers à des éditeurs commerciaux, mais de permettre une diffusion rapide et large des recherches réalisées, tout en

Madrid OR 2010 FECYT

ORBi will be present at Open Repositories 2010 (OR 2010): 5th International Conference on Open Repositories (Madrid, July 6th - 9th 2010)
📅 02/07/2010

Repositories increasingly play a pivotal role in the emerging information landscape. Through the format of blending general conference sessions that cover cross-cutting and overarching issues, followed by open user group meetings for DSpace, Fedora, and Eprints, Open Repositories attempts to create an opportunity to explore the challenges faced by user communities and others in today's world...

More info...

40,000 references and first use of ORBi within the context of the of evaluation of ULg researchers
📅 28/05/2010

Over the last year, thanks to the active involvement of the ULg researchers, ORBi has seen the number of its references growing from 10,000 (news of June 2009) to 40,000. Out of these, 25,000 are with full text. According to ROAR, this is the third highest growth rate among the 1,000 identified institutional repositories among the world.

Just published: a guide to legal aspects of scientific publication
📅 06/05/2010

The guide *Aspects juridiques de la publication scientifique. Guide pratique à l'attention des membres de la communauté universitaire*, written by Laurence Thys, lawyer and assistant at the Graulich Library (ULg), has just been published. It is available in Open Access at http://hdl.handle.net/2268/4277.

More info...

☒ ORBi (Open Repository and Bibliography)

In may 2007, the ULg's Administrative Board (joined in June 2007 by the FUSAGx ⮥) decided to create an institutional repository and defined a strong institutional self-archiving policy to increase the visibility, accessibility and impact of the University's publications (Board's decision).

In practice

45697 references in ORBi (**27449** with full text)

📊 More statistics

● First steps with ORBi : Practical information for the submitters

Specificities of ORBi

- **One system for two purposes : combines**
  - Open repository
  - AND institutional bibliography

- **Deposit totally made by ULg authors themselves (maybe helped by representatives)**

Libraries (ORBi staff)

  - develop and improve the system
  - add functionalities to help authors
 - inform authors, organize formations, promote ORBi internaly and externaly
  - …

BUT

  - Don't archive ANY reference or full text in ORBi

Université de Liège

Madrid
Fecyt
OR 2010
UNED

The ORBi adventure...

- **Step 1:** groundwork (2005 – June 2008)
  (analyse of the specificities of ULg publications in various disciplines, main strategic choices, development of the system, initial communication…)

  with pilot groups (not randomly choosen… but strategically selected)

- **Step 2:** kickoff (July 2008 – November 25 2008): volontaries

- **Step 3:** generalization : official launch: November 26 2008
  (November 2008 – February 2009)

- **Step 4:** consolidation (March 2009 – July? 2010)
  (retrospective deposit of a large part of publications since 2002)

- **Step 5:** routine (August 2010? –)
  (essentially deposit of current publications: +- 10/day?)

Success?

- **Yes! Far beyond our most optimistic expectations!**

Evolution of deposits on ORBi

Legend:
- Number of references
- Number of references with FT
- Linear trend since official launch (Nov 2008)

45386

27338

Université de Liège

Madrid
Fecyt
OR 2010 UNED

Success!

More than 45,000 references

- 75.6 references added /calendar day
- Extreme peak with 700 references added on a single day!
- Far beyond 10/day expected for routine!

According to ROAR (http://roar.eprints.org), ORBi is

- 37th out of 1042 research institutional or departmental repositories regarding the total number of records
- 3rd in high activity level (number of days in the last year with more than 100 deposits a day)

What about FT and OA?

- More than 27,000 with Full Text (60.5%)
- More than 12,500 OA (46.5% of FT)

Full Text in ORBi

Restricted Access 53,5%

Open Access 46,5%

Success!

Open Repository and Bibliography

Evolution of deposits on ORBi by year of publication

Expected level (3000-3500/year)

Legend: 2010, 2009, 2008, 2007, 2006, 2005, 2004, 2003, 2002
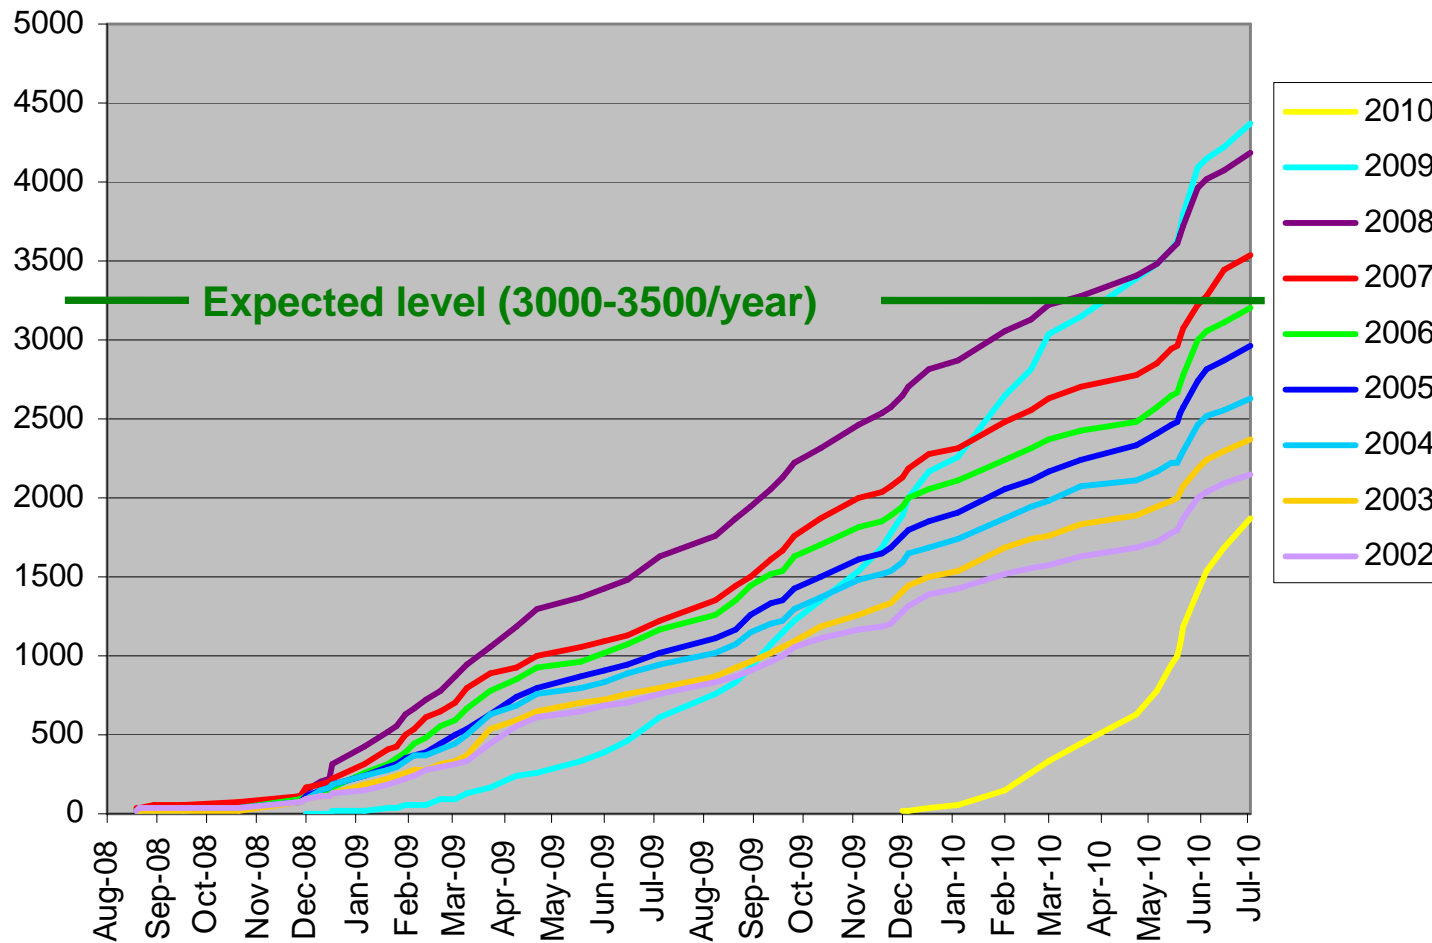

- ULg members publish more than expected
- Max/year not yet reached
- For previous years, the job is far from over…

Université de Liège

Why?

Open
Repository and
Bibliography

- **At least, a combination of 3 factors:**
  - first of all: a strong institutional policy

ULg Policy

…The day when everything happened…

November 2005 : ''OK, we'll do it!''

A strong mandate (''ULg mandate'')

– All scholarly publications since 2002 of all ULg members HAVE to be deposited into ORBi

– All scholarly articles of all ULg members since 2002 HAVE to be deposited WITH full text (open or restricted access, according to the publisher's policy: ID/OA immediate deposit – optional access)

A strong incentive for the scholars

Some months after the official launch of ORBi only those references archived in ORBi were to be taken into account for evaluations, appointments, promotions, budget allocations, grant application etc.!

Université de Liège

Madrid
Fecyt
OR 2010
UNED

OR10 – Thirion et al – ORBi in orbit
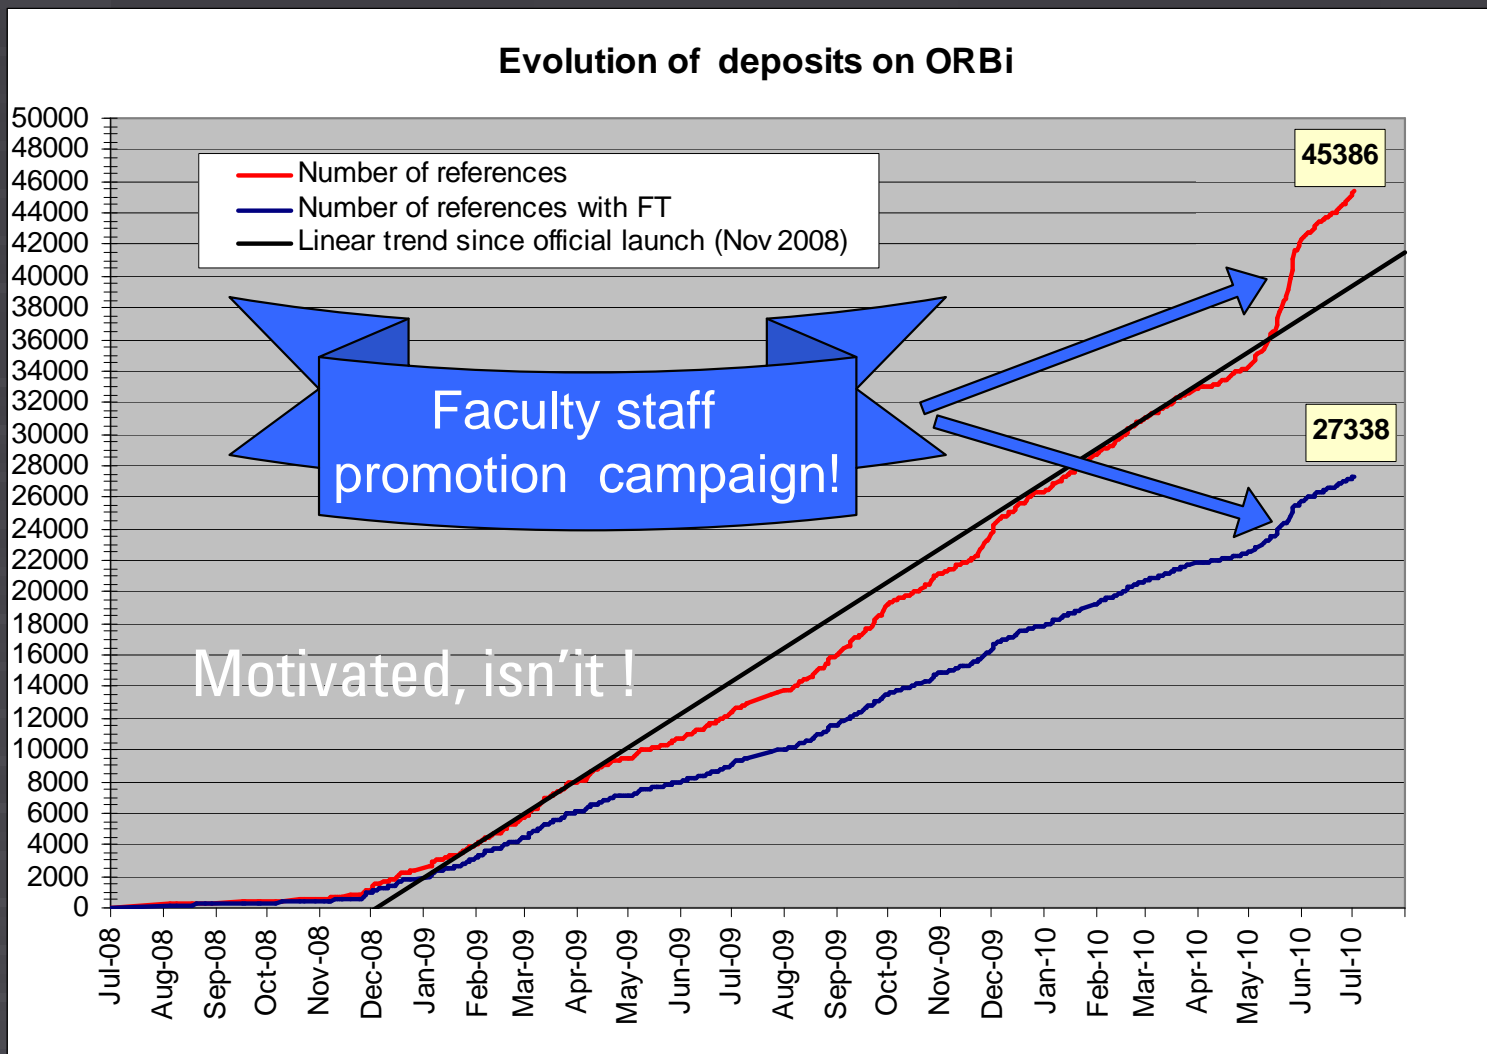

Enough to explain?

No!

– Many more references than required:

- 38.2% of archived references older than mandated (2002)

- Many authors understand "scholarly publication" in a very broad sense
    - Not only "traditional publications"
    - But also unpublished conferences, internal and external reports, learning materials, discourses and speeches…

- Scholars ask us to let them add references of colleagues who no longer belong to ULg (retired, dead…)

– Many more FT than required:

- 48.8% of articles older than 2002 with full text!

- 40.4% of "non articles" with full text!

Document types in ORBi

Open Repository and Bibliography

- 81.5% ''traditional'' publication
- 18.5% other types

Communications published in journals 3,7%

Books 3,2%

Parts of books (chapters…) 7,4%

Communications published in books 11,6%

Journals 53,9%

Dissertations and theses 1,7%

Unpublished conferences and posters 11,0%

Reports 3,5%

Others (patents…) 0,2%

Diverses speeches and writings 2,8%

Learning materials 1,1%

Université de Liège

Why?

- **At least, a combination of 3 factors:**
  - first of all: a strong institutional policy
  - the multi-players characteristics of ORBi

Université
de Liège

Madrid
Fecyt
OR
2010
UNED

A play with specific characters...

1. **Leading role: authors**

   – Role: adding all the references

   Keep back your paternity! It's your job and nobody can do it better than yourself!

   For us, the most important for a scholar is to teach and to search. The academic output of searching is scholarly publication. It's just as their children. Thus scholars can't continue to abandon their children just after publication! They have to take care or them in their whole life. No more orphans among publications!

   – Shared and collaborative work

   - The task is shared - publications by several ULg authors are introduced only once.
     Each of them can see and modify what is being done by the co-authors

        → spare time!

   - *And the responsability too!* One makes a mistake? All will suffer!
     So, feel concerned by the quality!

2. **Academic librarians: well placed to carry out such a project**

    – Specific skills in touch with
      - bibliographic databases and structure of information
      - specificities of scholarly communication in the different disciplines
    – Main concern for us

    Thus ORBi project team directly put under the leadership of the head librarian, daily involved in the project
    – Sign of the importance for the Institution
    – Large freedom of action (strategic choices…) => coherence & effectiveness

    ## Roles:
      - Whole development of the tool (conceptualization, designing the architecture, workflow definition, functionalities development, integration with internal and external tools, defining typology and classification, layout…)
      - Referencing
      - Promotion and training sessions
      - …and daily monitoring of deposits. **All the job behind the scenes…**

Université de Liège

Madrid
Fecyt
OR
2010
UNED

A play with specific characters...

3. ULg authorities

Roles:

- define and promote the ULg mandate
  - externally and internally
  - effectively
  - actively
  - consistently
  - … and without any exception for a ''dear colleague…''

- trust the Library Network
  …and let the ORBi team a large freedom of action

Université
de Liège

Madrid
Fecyt   UNED
2010

Why?

- **At least, a combination of 3 factors:**
  - first of all: a strong institutional policy
  - the multi-players characteristics of ORBi
  - the user-oriented improvement of the repository (focus on needs)
    - User-friendliness of submission
    - Added values
    - Sweat once, win many times…

User-friendliness of submission

- **The challenge:**
  - improve the standard submission process of DSpace
  - to an easy, quick (5-10 minutes) but also powerful process, meaningful for scholars from various disciplines

    in touch with the needs and wants of scholars and of the institution

- **Some improvements made:**
  - Creating of groups of submissions according to their status (submissions in progress by the authors, submissions in progress by co-authors, submissions to be signed…)
  - Standard DSpace submission steps reduced and reorganized logically in 4 steps (bibliographic elements – additional info – full text – validation)
  - Dynamic form adapting to document types (book, chapter, article…) avoiding non pertinent fields
  - Unambigous distinction between mandatory and optional fields
  - Context sensitive help

Added useful values for scholars

- ## Long term preservation

  – No more necessary to keep in mind on wich computers are stored the latest versions of all papers published by my laboratory (computer change, mobility…)

  – They are on ORBi! And they will remain there and be preserved in the future

- ## Automated bibliometrics & statistics

  – <u>ORBi statistics</u> number of views and downloads (updated daily)
    - from or outside ULg
    - only human accesses (exluding access from more than 20,000 spiders)
    - by reference, by author, globally, by month, by country, top 20…

Effects of platelet-rich plasma on rats' Achilles tendon healing
KAUX, JEAN-FRANÇOIS; DRION, PIERRE; LIBERTIAUX, VINCENT et al

Scientific journal (-)

Detailed reference viewed: 39 (21 ULg)

Etude comparative de 5 techniques de préparation plaquettaire (Platelet-Rich Plasma)
Peer Reviewed
KAUX, JEAN-FRANÇOIS; LE GOFF, CAROLINE; SEIDEL, LAURENCE et al

in *Pathologie Biologie* (in press)

Aim of the study: Injections of platelet-rich plasma (PRP) constitute a new therapeutic for treating chronic tendinopathies. The injection being carried out in the tendon, the volume of PRP should thus be ... [more ▼]

Detailed reference viewed: 216 (68 ULg)

Physiotherapy Intervention for Joint Hypermobility in Three Cases with Heritable Connective Tissue Disorders
Peer Reviewed
KAUX, JEAN-FRANÇOIS; FOIDART-DESSALLE, MARGUERITE; CROISIER, JEAN-LOUIS et al

in *Journal of Musculoskeletal Pain* (in press), 18(3),

Introduction: In Joint Hypermobility Syndromes, chronic pain is the most disabling symptom. Its origin can be multiple (i.e. subluxations, sprains, pathologies of tendons, ligaments, peripheral nerves ... [more ▼]

Detailed reference viewed: 111 (33 ULg)

L'image du mois. Exostose douloureuse de la métaphyse distale du fémur
HOGGE, MARTINE; KURTH, WILLIAM; CRIELAARD, JEAN-MICHEL et al
Peer Reviewed
in *Revue Médicale de Liège* (in press)

Added useful values for scholars

- ## Long term preservation

  – No more necessary to keep in mind on wich computers are stored the latest versions of all papers published by my laboratory (computer change, mobility…)

  – They are on ORBi! And they will remain there and be preserved in the future

- ## Automated bibliometrics & statistics

  – <u>ORBi statistics</u> number of views and downloads (updated daily)
    - from or outside ULg
    - only human accesses (exluding access from more than 20,000 spiders)
    - by reference, by author, globally, by month, by country, top 20…
  – Impact factor (current and from the year of publication), IF5, Eigenfactor, article Influence (updated daily for new references)
  – Citations (updated weekly)
    - Google scholars citations
    - Web of Science citations

Open
Repository and
Bibliography

- **Referencing!** Be more visible!

    Not sure everybody in the world will think : *''There is a beautiful university in a little country named Belgium with a fantastic ORBi system. Let see if somebody there has published something interesting!''*

    Active referencing to be visible

    - On large harversters (OAIster, Driver, Scientific Commons, Base…)
    - Google Scholars
    - Popular search engines
    - …

Sweat once, win many times...

- ## Automated tool for generation of <u>publications report</u>
  - with
    - Different output formats (PDF, HTML, DOC, XML)
    - Neat layout
    - Personalizations options
      - Specific requests
      - Different presentation models defined in collaboration with different faculties (STM, law, humanities…)
      - Different international bibliographic formats (APA, Chicago)
      - Optional elements (abstract, peer review status, bibliometrics…)
      - Sorting facilities, personalized report title…
  - Usable for
    - applying for appointments, promotions or budget allocations in ULg
    - adding a dynamic link to publications from a personal or service WWW page
    - generating a personal Curriculum vitae
    - submitting a file to the national scientific research fund (FNRS/FRS) (**they CAN use it in 2010 - they HAVE TO DO since 2011**)
    - preparing an external funding call (EU…)

IF 2004: **2.735**; last: **2.854**; IF5: **3.312** — EigenF 2004: **0.0315**; last: **0.0307** — Article Infl. 2004: **0.8825**; last: **1.0766**

The seriousness of varicella-zoster virus (VZV) infection as a public health issue is becoming clearer as country-specific epidemiologic and pharmacoeconomic data become available. In Germany, for example, studies have shown that >5.5% of immunologically healthy individuals develop varicella-related complications such as bacterial superinfections, acute neurologic disorders, pneumonia, bronchitis ...

Stouvenakers, N., Sadzot-Delvaux, C., & Rentier, B. (2001). Current issues : varicella. *Vaccines : Children and Practice, 4*, 20-22.

Rentier, B., & Sadzot-Delvaux, C. (2000). Le virus de la varicelle et du zona dans le système nerveux : retraite silencieuse ou guérilla permanente ? *Virologie, 4*(3), 207-216.

http://hdl.handle.net/2268/4164

Peer reviewed ✔

ORBi viewed: **98** (4 ULg) ; downloaded: **4** — Google Scholar cit.: **-**

Sweat once, win many times...

- **Automatic link from the staff directory (phonebook) of ULg**

Why?

- **At least, a combination of 3 factors:**
  - first of all: a strong institutional policy
  - the multi-players characteristics of ORBi
  - the user-oriented improvement of the repository
    - User-friendliness of submission
    - Added values
    - Sweat once, win many times…

- **And maybe an additional one: the "buzz effect"**

  With so many emails generated by ORBi and sent to co-authors:

  impossible to say "I didn't know…"

  "Oh! My colleague does it? So, I have to do it too!"

All positive? ORBi in orbit ?

Certainly Not!

So many things to do, so many problems to resolve, so many challenges!

- some duplicates (<1%) and encoding errors
- some middle-sized or small publishers don't understand what is OA and IR
- some author's fears: lake of knowlegde about their rights. Too many restricted access
- some authors reluctant : ''No time'' ; "Not my job"…

- improve and improve the tool and add new functionalities and links
- collaborate with nearby institutions to promote IR and realize large harvesting
- communicate, communicate and communicate again to convince about OA!

ORBi is still young and keep growing and changing… The road to maturity is still long!

This will be the coming episodes of the ORBi adventure…
